

# Keeping Hands & Feet Dry!

The Strengths of Hotronic's ...

## Snapdry

### BOOT & GLOVE DRYER

#### WET HAND & FOOTWEAR

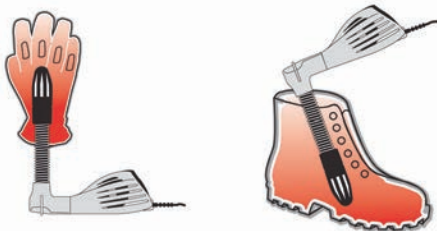

Wet outside conditions often contribute to damp, even drenched hand and footwear. At the same time, moisture buildup from perspiration contributes significantly as well. Once damp, hands and feet can become uncomfortable, even cold. If damp conditions persist, increases in bacterial and fungal growth can cause unpleasant health conditions for hands and feet and further their discomfort.

#### DRY HAND & FOOTWEAR

By providing the gentle air and heat of Hotronic's Snapdry Boot & Glove Dryer, damp conditions from moisture buildup are reversed deep within the hand and footwear materials. A dry, comfortable, healthy environment is created.

Using Hotronic's Snapdry Boot & Glove Dryer on a consistent basis maximizes the potential for dry, comfortable, healthy hands and feet.

#### HOTRONIC'S SNAPDRY SYSTEM

Hotronic's Snapdry Boot & Glove Dryer offers quick, quiet, drying and pre-warming of hand and footwear. Designed with the strength of its patented "Quick Clip" system and a long lasting motor, the Snapdry Boot & Glove Dryer also travels well, wherever one goes, worldwide.

#### FROM THE INSIDE

What happens inside hand and footwear is easily felt and understood but not easily quantified. The following offers some perspective as to why hand and footwear is often damp and cold.

*"Feet perspire more than any other part of your body except your head and hands. Each foot perspires about 1/4 cup (0.6 dl) of water a day at rest and one full cup (0.24 lt) when active."* (W.L. Gore and Associates, 1994)

*"Wet conductive heat loss is 23 times greater than dry heat loss."* (W.L. Gore and Associates, 1994)

# Keeping Hands & Feet Dry!

The Strengths of Hotronic's ...

## Snapdry

### BOOT & GLOVE DRYER

#### QUIET AND TIMELY

Snapdry's quiet, long lasting motor maximizes the Dryer's use at any time, any season, day or night. Plus, the built-in timer provides up to a maximum of 24 hours drying time. Turn it on, forget about it, and rest assured. The power indicator light further confirms the Dryer is on or off at a quick glance.

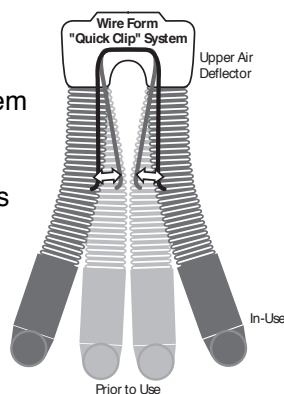

#### DRIES AND PRE-WARMS

Using gentle air and heat, Snapdry's Boot & Glove Dryer quietly dries and pre-warms all types and sizes of hand and footwear. Dries within one to five hours. Pre-warms in 30 to 60 minutes. Keeps hands and feet warmer longer by enhancing circulation.

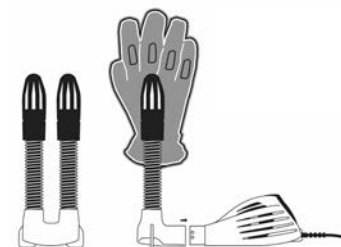

#### QUICK AND STRONG

Snapdry's patented "Quick Clip" system inserts in seconds into boots, shoes, gloves, and mittens. The "Quick Clip" system provides strength and protects the upper air deflector from damage while holding the hand and footwear together and upright.

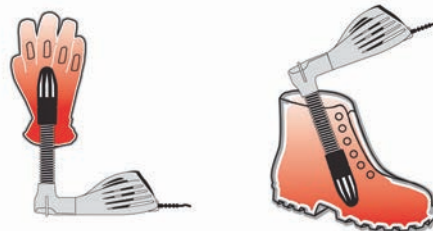

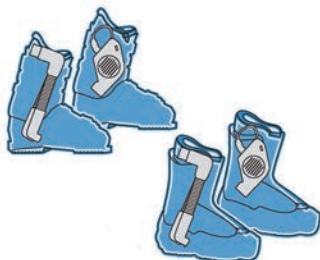

#### HEALTHY HANDS AND FEET

Utilizing the integrated hand wear stand, Snapdry's Boot & Glove Dryer separately dries hand and footwear to minimize potential transfer of bacteria and fungus between hand and footwear. When consistently drying hand and footwear, the Snapdry Boot & Glove Dryer minimizes potential bacterial and fungal growth by maintaining a dry, comfortable, healthy environment for hands and feet.

#### TRAVELS WELL

Wherever one goes worldwide, the Snapdry Boot & Glove Dryer simplifies travel with a dual voltage selector switch (120V/230V). Plus, the Dryer packs conveniently inside boots or the included storage bag.
